The Taft Educational Center (TEC) is the oldest and largest summer institute in New England, offering professional development for high school teachers. Our intensive workshops in both AP™ and non-AP™ disciplines allow attendees to better understand the skills and content high school students need to be prepared and successful, while building contacts and relationships with fellow educators.

At TEC, we understand that your time is very valuable; we strive to give you a week of professional development that will immediately elevate your teaching.

For most of us, these past few years have been like no other. The challenges facing the global community have required us to think carefully about our learning community. This year, we are building a professional development program for teachers that will have a majority of our workshops virtual and a few that will take place on our beautiful campus. These options allow us to continue delivering the high-quality educational programming we are known for, while keeping the safety of our instructors and learners at the forefront. As we work towards finding a balance between remote and on-campus workshops, we will offer all our science workshops on site. We are hoping that in future summers we can get back to our workshops on campus.

For more information or to register online, visit TaftSchool.org/TEC.
Why TEC?

"Truly the best teacher training I have ever had."

While professional development is not required to prepare for 2023-24 AP course updates and new classroom resources, the College Board does encourage AP teachers to take advantage of the professional development offered by an endorsed AP institute like TEC. Traditional AP Summer Institutes are 30 or more hours of content-rich professional learning designed to strengthen how participants teach their AP Courses. Participants leave with ready-to-use strategies and pedagogical tools shared by an experienced AP educator, and will have explored these AP resources in depth: Unit Guides, Topic Questions, Personal Progress Checks, the AP Question Bank, Instructional Planning Reports, Syllabus Development Guides, Sample Syllabi, and the AP Community.

"Engaging, interesting, and relevant; I can’t wait to bring new strategies back to my school."
